

Foggia Airport - "Gino Lisa"

Regional tourism-oriented airport , the airport of Foggia, strategically placed within an articulated road and rail system, has completely been upgraded , both from an architectural point of view that functional, able to guarantee good service standards.

The airport of Foggia is serving a traffic by the strong potential, which stands out the important industrial settlements , even in the nearby Basilicata. The holiday industry of the Gargano and Tremiti Islands, tourist paradise of great appeal, especially among those who come from Northern Europe - and the religious tourism may be the ideal conditions, together with the economic vitality of the territory for a lasting revival of the airport.

Even in terms of infrastructure flight - runway, apron stop aircraft, via taxiway - the Foggia stopover at the end of major upgrading work, can ensure the full operation of aircraft of medium capacity (Bae 146 Dornier Saab 2000) the use of which prove more successful for the development and consolidation of commercial, scheduled and charter traffic.
